Subject: RE: FAQ on health effects

Good morning Renee. Are you able to provide the pretty version to me this morning? Or do you have an ETA for that?

I'd like to put this line in my next fact sheet, under **What precautionary measures can help?**:

- Read and follow the Oregon Health Authority's message "Health Effects of Exposure to Volatile Chemicals and What You Can Do to Prevent Them" attached to this fact sheet.

I'd print your health message and staple it to EPA's fact sheet, if you think that will work. Ideally today.

Thanks!

k

Subject: FAQ on health effects

Kay,

Attached are talking points/FAQ on VOC health effects for you to use. I am also working with our communications folks to make a prettier version. That might not be ready until tomorrow. I will send it to you as soon as it is ready.

The attached talking points are probably best suited for general outreach. For impacted residents that have more specific questions about their individual health risks, we feel they should 1) call 911/Poison center if there is an immediate need or 2) contact one of our toxicologist/medical staff for a direct conversation. The two contacts would be Dr. David Farrer (971-673-0971) or Dr. Richard Leman (971-673-1089).

Please let me know if there is any additional information I can provide.

Renee
